Module – 2, Hands-On – 4

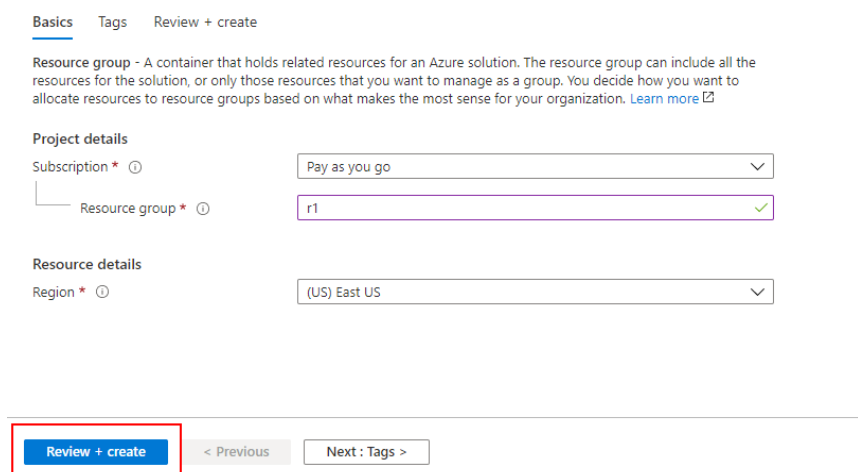

1. Goto search tab, search for resource groups and select the service.

2. Click on create to create a new resource group.

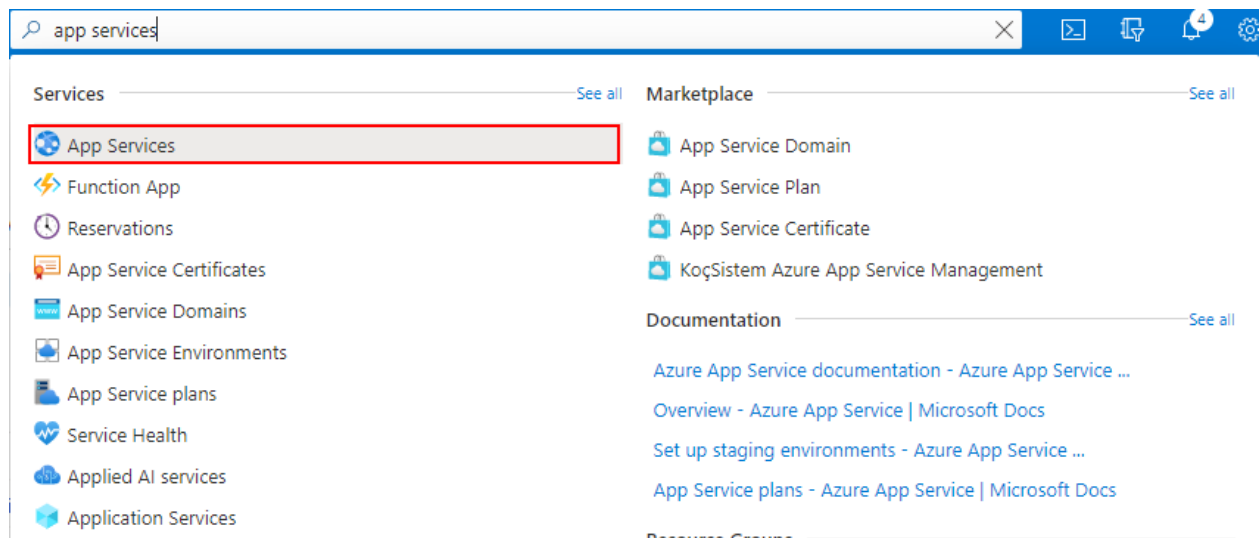

3. Give the name of the resource group. Then , click on review + create.

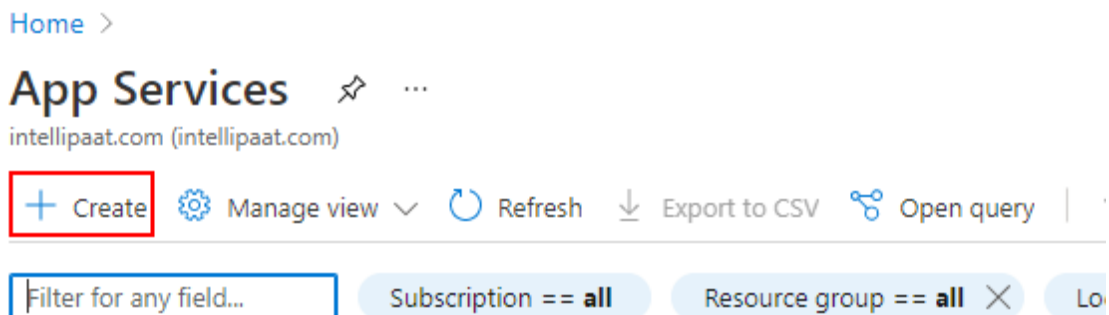

4. Repeat the steps 1, 2 and 3.

5. Goto the search bar, search for app services and select the service.

6. Click on create to create a new app service

7. Fill in the details. In the resource group, remember to give the name of the first resource group that you created. Then, click on review + create.

Resource group (change) : r1

Status : Running

Location : East US

Subscription (change) : Pay as you go

Subscription ID : ca919e20-8606-4efa-ab35-7f08ded4b58d

Tags (change) : Click here to add tags

URL : https://testing-app-1.azurewebsites.net

Health Check : Not Configured

App Service Plan : ASP-r1-bc6d (\$1: 1)

FTP/deployment username : No FTP/deployment user set

FTP hostname : ftp://waws-prod-blu-081.ftp.azurewebsites.windo...

FTPS hostname : ftps://waws-prod-blu-081.ftp.azurewebsites.windo...

JSON View

10. Select all the resources related to the app service. Type in the name of the second resource group which you created at step 4. Tick the box and click on OK.

Home > Resource groups > r1 > testing-app-1

Move resources

Resources to move

Resource	Type
testing-app-1	App Service

Related resources to move (optional)

☒ Select all

Resource	Type
testing-app-1	Application Insights
ASP-r1-bc6d	App Service plan

Move these resources to

Resource group *

r2

☒ I understand that tools and scripts associated with moved resources will not work until I update them to use new resource IDs ⓘ

OK

Create a new group

11. Wait for the resources to move to the second resource.

12. Goto the second resource and you will find the app services made in the first resource group shifted to the second resource group.

Resource group: r2
